

Cortexa Labs

Model orchestration infrastructure for generative AI applications

CONFIDENTIAL - Prepared by Direct outreach (no bank listed) | March 2026

Highlights

Sector	Generative AI infrastructure - model orchestration tooling
Headquarters	San Francisco, CA, USA
Founded	2025
Stage	Pre-revenue, seed
Revenue	\$0 - private beta, no paying customers yet
Design partners	12, unpaid pilot agreements
Raising	\$4M seed

Company Overview

Cortexa Labs is building an orchestration layer that lets enterprise teams route requests across multiple foundation models with automatic fallback and cost optimization.

The product is currently in private beta with 12 unpaid design partners; the founding team (ex-large-cloud-provider ML infra) is raising a \$4M seed to fund the first 18 months of product development ahead of a planned paid launch.
