Recurring revenue	88% of total revenue
Raising	\$30M growth equity

Company Overview

Brightline HR sells payroll-compliance audit software to mid-market employers across the US, with 410 customers as of this filing.

Growth has slowed from 35% YoY two years ago to 12% YoY today, and net revenue retention has declined from 108% to 94% over the same period, driven by increased churn in the company's smallest-segment customers (<200 employees). The company attributes this to a 2025 pricing change and says renewal trends have stabilized in the most recent quarter.
